- Parents can confirm whether their child is returning for the next academic year.
- Digital submission of required forms and declarations.
- Automated reminders for pending re-enrolment responses.
- Real-time tracking of re-enrolment status by school administrators.

The image shows two smartphones side-by-side, both displaying the same app interface for 'Mobi International School'. The app has a dark blue header with the school's logo and name. Below this, the title 'Re-enrolment 2025-2026' is displayed in bold. A paragraph of text follows: 'Please let us know your intentions for the next Academic 2025-26 year. The re-enrolment invoice will be on the SchoolApp on Monday 24th February 2025 and payment is due by Tuesday 8th April 2025. For any queries, please contact Reenrolment@mobatia.in'. Below this text, there is a section for a student named 'Test Student4' with a small profile icon and the number '3'. Underneath, there is a 'Date' label and a text input field containing '08 Jun 2026'. At the bottom right of this section is a blue 'SUBMIT' button. The second smartphone shows a similar interface but with a dropdown menu labeled 'Please Select' and a blue button labeled 'IMPORTANT NOTE ON RE-ENROLMENT' above the 'SUBMIT' button. The bottom of both phones shows a navigation bar with three star icons and a home button.

Schematic Diagram

App User Authentication & Access

- mobiSchool has a built in user registration and login process where user can register using their email id or phone number.
- API calls are validated with 256-bit session limited tokens.
- Alternatively can use 3rd party user authentication services and school information systems already existing services.
- We can also import the user profiles from legacy systems.
- Optional SSO Integration.
- Optional bio-metric authentication.
- Optional 2-factor authentication.

Customization & Integration

- 100% Customizable mobile App and CMS.
- Existing features can be modified or removed according to the need of Schools.
- New ad-hoc features can be added as per requirements.
- Unlimited Integration with school information system.
- Integrate with 3rd party service providers like bank Payment Gateways, canteen, EAP providers, transportation etc. Dependency limited to REST APIs/Webservices from external service providers.

Data Policy

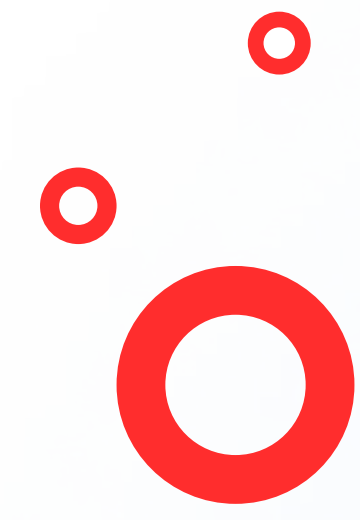

- User access by authentication
- User allowed to delete his own account
- Role based user access to CMS backend
- Access lock-out on repeated unsuccessfully login attempt.
- Password reset link sent to users instead of clear text password via email
- Minimum password complexity enforced for mobile users
- Restricted access to student profile and reports

Security & Privacy

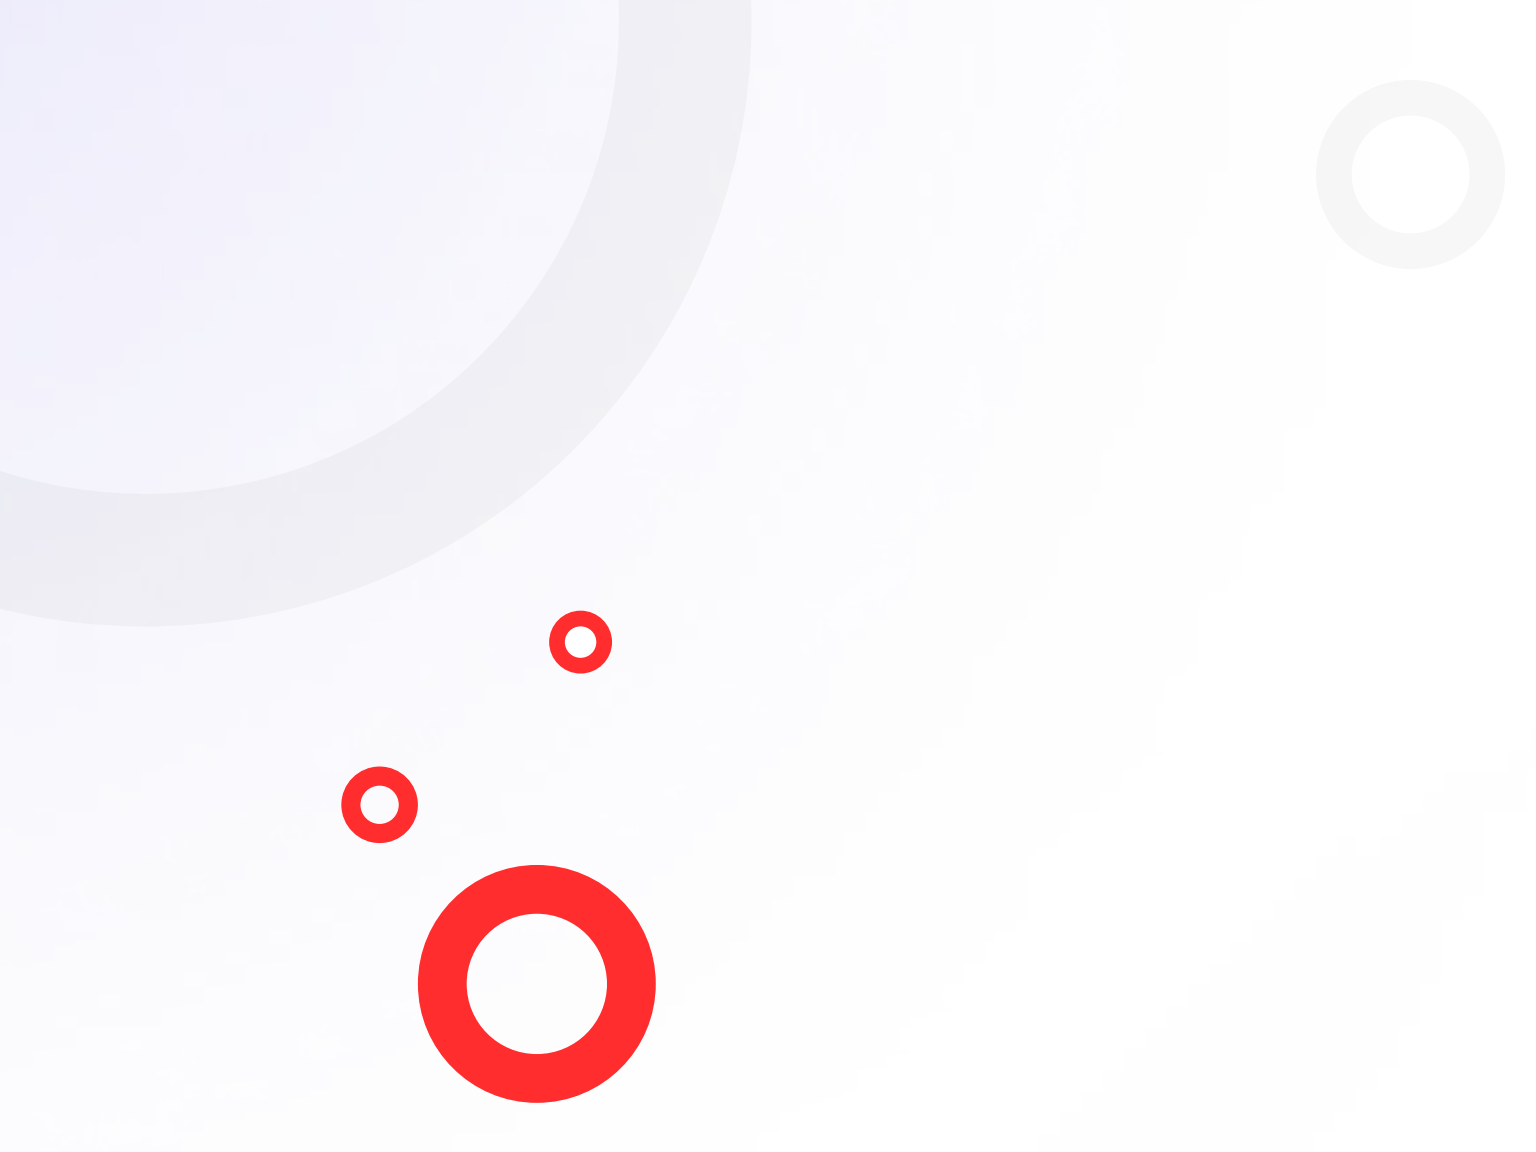

- The system generates and uses an encrypted session limited token to ensure data security while in transit.
- Website and webservices are secured with 256-bit TLS/SSL encryption.
- mobiSchool uses only GDPR and PCI-DSS compliant services for server hosting
- Personal Data Encryption in transit.
- Role-Based Data Access Permissions
- Only valid and secured ports enabled and all other unused ports will be blocked.
- AWS S3 Bucket used for media and report files.
- Terminal access is allowed only from pre defined Public IP Address.

Scalability & Reliability

- Supports approx. 2500 concurrent app users by default
- Queues implemented to handle routine tasks and load balancing
- Automatic vertical scaling to support usage spikes by elastic cloud hosting
- Easy hardware upgrade to meeting specific seasonal events or planned usage peaks

Technology & Frameworks

- Mobile Apps
 - iPhone App – React Native
 - Android App – React Native
- Backend CMS and Web services
 - Backend CMS and Web services
 - Website UI – HTML5, Bootstrap, CSS3, JQuery, JavaScript
 - Webserver – Apache with Linux
 - Database - AWS Aurora mySQL
 - Framework – Laravel 12+ (latest)
 - Coding – PHP 8 (latest)

Thank You!
